## Curated Collection by Zébulon Perron

For the last 20 years architectural designer Zébulon Perron has completed hundreds of interior design projects, mainly in the hospitality industry. His career and his love for design have led him to work on a variety of scales and in many different mediums: furniture, art objects, and graphics among others, making him a well-known figure on the local Montreal scene.

Recipient of numerous awards in his discipline, this committed lover of his city is inspired among other things by contemporary art and photography to create authentic and striking spaces that stand the test of time. He is the president and artistic director of Atelier Zebulon Perron, which he founded in 2008.

"I compiled this collection because it showcases an interesting cross section of artists at various stages of their evolution: old and young, established and up and coming, local and international. I see in these works a certain relationship to my own practice, exploring spatial relationships and graphic in nature, each piece achieves a level of abstraction without ever completely losing their connection to the real world."
